

## Bin Trolleys

The bin trolley is a tough polyethylene bin on a 304 grade stainless steel dolly designed to transport large loads of waste or linen in a fully concealed bin with the features of an opening sided trolley.

Featuring gas Strut assisted lid and fully concealed from the public, reducing odours in corridors and unsightly spills from the trolley. The six wheel configuration makes this trolley easy to manoeuvre even with a full load, so your staff will love to use this trolley.

### Features:

- Fully assisted gas strut lid
- Opening side with locking pin
- Optional drain with plug
- Six wheel castor configuration for easy mobility
- Hanging basket for extras such as garbage bags

### MOTORDRIVE CONVERSIONS

For heavier loads, trolleys can be fitted with our 24V dual MotorDrive system, which features both forward and reverse drive, emergency stopping and electro-magnetic braking.

### Bin Trolley

Description	Length / Height / Width (mm)	Capacity (Lt)	Colour
Bin Trolley	1320 / 1030 / 710	1000	White
Bin Trolley	1220 / 950 / 610	450	White
